ZACK BORGES
FULL STACK DEVELOPER

Denver, Co | zackartborges@gmail.com | 954-806-3516
github.com/zborges | https://www.linkedin.com/in/zack-borges/

Driven and ambitious Developer with experience utilizing effective database management and managing server/client-side applications. Experience leading projects and communicating with clients across internal teams.

SKILLS

Languages: Ruby, JavaScript, TypeScript, Python
Frameworks/Libraries: Rails, React, React Native, Node.js, Vue.js, Nuxt.js, GraphQL, GraphQL Code Gen
Databases/Tools: PostgreSQL, SQL, MongoDB, Redux, Docker, Vim, Sidekiq, Kubernetes, Git, GitHub, JSON/XML, Jest, Rswag, Rspec, Heroku, HTML5, CSS3, PM2, Strapi, Tailwind, Cloudwatch, Jira, Miro, Metabase

EXPERIENCE

Booz Allen Hamilton | Software Developer   **2023 - Present**
- Refactored large components and forms within a React application utilizing Redux to perform efficient data storage, while effectively interacting with and retrieving data from a Ruby on Rails API.
- Worked collaboratively with a team of 4 developers to resolve over 50 SNOW tickets and bugs within a large scale application by debugging program errors and conducting program tests.
- Demonstrated strong written and verbal communication skills by presenting SOP's created in regards to code changes and any tickets that required routine changes in production data.
- Utilized Cloudwatch, Metabase and SQL to effectively compare and analyze data from multiple databases searching for similarities and common patterns in corrupt processes.
- Resolved tickets submitted by users that involved updating critical production data within an AWS EC2 instance.

Digital Scientists | Software Engineer   **2021-2023**
- Exercised technical expertise in React and Ruby on Rails to implement several back-end and front-end features and fix critical bugs on multiple web applications.
- Owned and managed an important client project through effective communication, implemented bug fixes and led new feature buildouts.
- Reviewed code through semi-monthly peer reviews to discuss code and possibilities for improvement.
- Utilized advanced Python to generate image noise, improving the accuracy of the machine learning OCR model.
- Collaborated on multiple agile teams of 3-6 people using Jira for workflow management.
- Produced high-quality documentation of a large-scale Rails RESTful API with over 100 available actions using Rswag, additionally identified and fixed outdated Rspec test files.
- Leveraged Docker to create a scalable and reliable system for storing database images and a Redis server.

EDUCATION

Georgia Southern University | Bachelor of Arts in Psychology   **2019**

CONTINUED EDUCATION

Actualize Coding Bootcamp | Certificate in Full Stack Web Development   **2021**
A four-month full-stack web development bootcamp. Core technologies included Ruby, Rails, JavaScript, and Vue.js. Special emphasis on API-driven development, version control with Git, professional tooling, team collaboration, and continual learning.
